

Science Fair Project 2024

Dear Parents/Guardians,

We will be holding our annual Science Fair on Friday 9th August 2024 (Term 3 Week 3). Details are provided below if your child wishes to participate.

When: Friday 9th August 2024

What is a Science Fair?

A science fair is a chance to display your creativity and scientific skills. You have 5 weeks to brainstorm ideas and make your project or experiment.

What do I need to do?

- *Create a science project at home; you may work individually, with a partner or small group. Projects will not be judged. It is a chance to share student's creative ideas and knowledge of how they see science.
- *Research your idea, find out materials needed and make it!
- *Have your name clearly displayed on the project.
- *Have the name of your project clearly displayed and any important information.
- *Be prepared to explain and show your project at the fair.
- *Ensure your project can be brought to school easily and is **SAFE**.
- *Remember to have fun while making your project.

If you have any questions please come and see Mrs Murphy and Miss Woodcroft, as they will be more than happy to help.

Thank you,

Mrs Murphy and Miss Woodcroft
Science Fair Co-ordinators
